

For Immediate Release

Tymphany to launch new Peerless HDS Products

HDS Mid-Range series to be latest release from Peerless brand

June 11, 2009 – Tymphany HK Ltd., the parent company and manufacturer of the Peerless™ brand of loudspeaker components is announcing its newest line of Peerless products to reach the global OEM audio market.

The seven new Peerless mid-bass drivers are a continuation of the existing High Definition Sound (HDS) line and will implement the design and technological heritage it has compiled throughout its 85-year history.

A powerful ferrite magnet system is coupled to a finite element analysis designed suspension system, containing a linear spider design and rubber surround. The motor contains an aluminium shorting ring, which reduces coil inductance, thus providing both extended frequency response performance and reduced second harmonic distortion. The long-throw voice coil ensures linear high excursion performance needed for signal clarity. The cone necks are vented so as to reduce air compression effects under high excursion conditions. The cast aluminium basket offers high structural rigidity, heat sinking capacity for the motor, and additional air venting under the spider reducing air compression effects. The cone comes in either a glass-fibre composite (GFC) or aluminium offering a unique acoustic and visual experience for the OEM.

The HDS line is set to launch in late June 2009. For data sheets, specifications, or to obtain a sample, please direct all inquiries to your Tymphany Sales Representative or to sales@tymphany.com.

This launch is the first of a series of new product development efforts to reach market since Tymphany was acquired from its Danish parent by new management. Though sales and marketing offices remain world-wide, as of January 1, 2009, Tymphany is now a Hong Kong-based corporation. Tymphany holds all rights to tooling, design, data and intellectual property associated with the Peerless and Vifa component transducer brands.

About Tymphany

Tymphany is the world's premium supplier of innovative, high quality loudspeakers and audio systems. With over 80 years of audio design, development and manufacturing expertise, Tymphany is widely regarded as having the strongest portfolio of technology and design experience in the loudspeaker industry.

The new Hong Kong based Tymphany manufactures OEM/ODM loudspeakers for many of the world's leading audio brands and also develops and sells transducers under its own Vifa and Peerless brands. All Tymphany products are manufactured in a newly constructed, ISO-certified facility in Xinxu, China. Tymphany is a privately held corporation. More information about the company is available at www.tymphany.com.
